Phone conversation with Troy Metler and Deanna Debow  
May 21, 2007

Troy called me to say that Sara Elephant was stiff on her LF prior to the walk into Little Rock, AR. On closer examination he found an NBA on D3. I asked him to give her 10cc banamine IM. After she is trucked in, he will soak the foot and pare out the nail. I told him if he felt it necessary, he could give her another 10cc of banamine tomorrow.

I discussed this in a second conversation with Deanna.

Please add this note to Sara's medical records.

Thanks

Ellen Wiedner, VMD, DACVIM
