11 DEC 2003 BLOOD DRAW, (L) EAR, SERUM & EDTA, FOR
CBC/CHEM. SERUM BANKED AT CEC
ALL

18 DEC 2003 PE: DRY SKIN, DECREASED LEVEL OF
ACTIVITY REPORTED BY MANAGERS.
T = 98.2, P = 60, R = 12. LUNG
FIELDS AUSCULT WNL. UMBILICUS
MILDLY INFLAMMED WITH UMBILICAL
BULGE (HERNIATION) PRESENT.
NO WEIGHT GAIN NOTED IN PAST 5 DAYS.
BLOOD COLLECTED, L & R EAR, SERUM &
EDTA, FOR CBC/CHEM/PROTEIN EP.
DEFECATED NORMAL SOFT FORMED FECELS.
SAMPLE COLLECTED FOR CULTURE, DIRECT,
FLOAT. ALL

21 DEC 2003 DECREASED LEVEL OF ACTIVITY CONTINUES...
CBC/CHEM/PEPH REVEALS DECREASING
TOTAL PROTEIN, A SHIFT TOWARDS MONOCYTE
FELCA ANALYSIS PENDING. ACTIVITY IS
IMPROVED COMPARED TO YESTERDAY.
INITIATED 4 GRAMS OF FAMCICLOVIR
PER RECTUM TO BE ADMINISTERED.
TWICE DAILY. ACTUAL RETENTION IS
APPROX 3 GRAMS. FELD 0024003

RICKARDO ASIAN ELEPHANT

14 APRIL 2004: CC - CHANGE IN FECAL CONSISTENCY WITH INCREASE IN FREQUENCY OF DEFECATION. CONSISTENCY OF FECELS IS SIMILAR TO THICK WHIPPED CREAM. COLOR IS LIGHT TAN.

HX: 24 HOUR DURATION; MANAGER ALSO FEELS THERE IS ASSOCIATED ABDOMINAL DISCOMFORT.

PE: RECTAL TEMP = 98.8, HR = 62, MUCOUS MEMBRANES PINK & MOIST W/ CRT < 2 SEC. NO LESIONS VISIBLE IN MOUTH. OBSERVED RICKARDO OUTSIDE DURING PLAY; VERY BRIGHT, ACTIVE, AND ENERGETIC; VERY PLAYFUL.

PX: FLUNIXIN, 200 mg (4 cc), IM, ONCE. WITH PEDIALYTE AND/OR PEDIALYTE WITH OATMEAL TO REPLACE MILK FORMULA FOR 24 HOURS.

PLAN: FECAL CULTURE SUBMITTED; CBC/CHEM SCHEDULED FOR TOMORROW; RETURN TO MILK FORMULA IN MORNING.

RICCARDO ASIAN ELEPHANT

15 APRIL 2004 - RICCARDO IS BRIGHT, ALERT, AND ACTIVE THIS MORNING; RETURN TO FORMULA (MAX 2000 ml FOR FIRST MEAL; MAX 2500 FOR SECOND MEAL; AD LIB THERE AFTER);

- BLOOD COLLECTED FOR CBC/CHEMISTRY AND IN HOUSE PLV + PP; ^{A FLORIDA} ~~SE~~ PCV=29 AND PP=

- RECOMMEND ADDITION OF IRON SUPPLEMENTED ENFAMIL TO REPLACE HALF VOLUME OF LOW IRON ENFAMIL; ~~B~~ CHANGE INITIATE TODAY; AMOUNT OF BUTTER HAS BEEN DECREASED; OATMEAL CEREAL IS REPLACING VOLUME OF RICE CEREAL.

- BLOOD WORK REMAINS UNREMARKABLE ASIDE FROM LOW PLASMA PROTEIN AND LOW HEMATOCRIT; THERE IS A SHIFT FROM MONOCYTES TOWARD LYMPHOCYTES IN TODAY'S RESULTS; THIS COULD BE LAB VARIATION;

- CONTINUE CURRENT FEEDING; NO MEDICAL TREATMENT INDICATED

AE

FELD 0024005

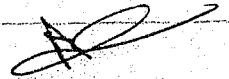

RICCARDO ASIAN ELEPHANT

16 APRIL 2004 CC - DOWN SLEEPING MOST OF DAY,
NORMAL MILK INTAKE, INCREASED
FREQUENCY OF SOFT STOOLS CONTINUES.

PE - BRIGHT, VERY ACTIVE IN LATE EVENING -
TOO ACTIVE TO AUSCULT GUT SOUNDS;
HEART RATE; MUCOUS MEMBRANES PINK;
GOOD FORMULA INTAKE FOR DAY;
FECAL CONSISTENCY IS THICK "COUL PIE"

RX - FLUNIXIN, 200 mg (4cc), IM, ONCE

A&P - LOOKS GREAT TONIGHT, EATING WELL,
ACTIVE; RECHECK IN MORNING;
CONSIDER SUBMITTING BLOOD WORK
TOMORROW IF NECESSARY.

RICCARDO ASIAN ELEPHANT

- 17 APRIL 2004 - RICCARDO IS BRIGHT, ALERT, AND ACTIVE THIS MORNING; FORMULA CONSUMPTION IS FAIR/GOOD THIS FAR TODAY; (2000, 1700, 1500, WEIGHT GAIN OF 4 LBS OVER PAST 2 DAYS; FECAL FREQUENCY CONTINUES TO BE UP TO 4-6 TIMES DAILY; CONSISTENCY RANGES FROM SOFT TO FIRM "COW PIE";
- NO INDICATION TO SUBMIT BLOOD SAMPLES TODAY
 - NO INDICATION FOR ANY MEDICAL TREATMENT AT THIS TIME.
 - PLAN FOR MONDAY: SUBMIT FECAL TO KISSIMMEE LAB FOR VIRAL E.M.; SUBMIT FECAL TO ANTECH FOR OVA/ PARASITES.
 - CONTINUE FORMULA WITH DECREASED BUTTER AND ORIGINAL RICE / OATMEAL RATIO.
 - MOST RECENT FECAL IS THICK AND HEAVY "COW PIE"
 - VERY ACTIVE AND PLAYFUL
 - RECHECK BLOODWORK END OF NEXT WEEK

FELD 0024007

RICCARDO ASIAN ELEPHANT

21 APRIL 2004 - RICCARDO IS BRIGHT, ALERT, AND VERY ACTIVE. RECENT HISTORY OF DECREASED ACTIVITY (2 DAYS) COMBINED WITH LAYING DOWN. DECISION WAS MADE TO INTRODUCE AND GRADUALLY REPLACE ENFAMIL WITH GROBER'S ASIAN ELEPHANT FORMULA. SUSPECT GI COMPLICATIONS WITH ENFAMIL/SOY FORMULA. - CURRENTLY AT 50% ~~B~~ GROBER'S / 50% ENFAMIL. MANAGER FEELS RICCARDO MAY HAVE MILD ABDOMINAL DISCOMFORT ASSOC. WITH THE CHANGE. WILL INCREASE TO 75% GROBER FORMULA AFTER 24 HOURS OR SO ADJUSTMENT. MANAGER FEELS THERE IS OVERALL IMPROVEMENT ASSOCIATED WITH THE CHANGE, HOWEVER - PE: T = 98.4 (DISTAL RECTUM); HR = 70 (EXCITED); GI SOUNDS: 1 PER 1-2 MIN; MUCOUS MEMBRANES PINK, CRT = ~2 S; MANAGER FEELS THERE IS MILD ABDOMIN. DISTENSION; DIFFICULT TO MEASURE OBJECTIVELY; WEIGHT GAIN CONTINUES AT ~2 LBS/DAY; FECES IS CREAMY, YELLOW WHITE THICK WHIPPED CREAM CONSISTENT - IN HOUSE SAMPLE ANALYSES: PCV = 30, PP = 5.
