ASIAN ELEPHANT

(Elephas maximus)

NORTH AMERICAN REGIONAL STUDBOOK

1 JANUARY 2003 – 30 APRIL 2005

MIKE KEELE – STUDBOOK KEEPER

KAREN LEWIS – CONSERVATION PROGRAM ASSISTANT

MESSAGE FROM THE STUDBOOK KEEPER

As a complete studbook, information is included on Asian elephants that we were able to document as existing at one point in time in North America. This edition includes information on 624 elephants, 98 more than the last edition which was published in 2000. 20 of these animals were captive born. The remaining 78 additional elephants were added because we received historical animal records that validated their existence. Of the 624 elephants in the Studbook, 273 (46.227) are living and 139 (23.116) are currently house in AZA facilities.

We have added two additional sections to this edition of the Studbook. A “Lost To Follow Up” section lists 6 male and 40 female elephants whose current location is unknown to us. The “Undocumented” section lists 37 male and 248 female elephants that we believe are individuals who existed in North America at one time, however, we lack any official supporting documentation to give them official studbook numbers. There is a chance that some of these elephants already have studbook numbers under different house names, it is also likely that some of the undocumented elephants are duplicates of one another. It is important that we have appropriate supporting documentation to avoid assigning more than one studbook number to the same elephant. In our continuing efforts to validate all of the undocumented elephants, we would like to solicit your help by requesting that you review both of these new sections and provide us with any information that might help us locate the elephants that have been lost to follow up, validate the undocumented elephants, or lead us to someone who might be able to.

A majority of the work associated with publishing this Studbook was performed by Karen Lewis. Karen serves the Oregon Zoo as our Conservation Program Assistant. She surveyed facilities and compiled the information used in this publication. She has done most of the data validation in addition to making contacts with many of you who have contributed animal information to the Studbook. Our future efforts will be to continue to validate historical information and we will be contacting many of you to assist us with that effort.

Karen has also recorded individual reproductive information into each animal’s studbook file as well as passed the information on to Janine Brown, Reproductive Advisor to the Elephant TAG/SSP. Dr. Brown has done considerable work with female reproductive cyclicity and anomalies. She extends her gratitude to all of you who provide the requested information. We plan to continue to compile this information in an ongoing effort to establish the complete reproductive life-cycle of elephants.

Special thanks for all of you who have been responsive to our requests for information and for responding to our surveys. We could not have accomplished this publication without your efforts.

Additional information or corrections are enthusiastically welcomed and should be forwarded to either myself or Karen.

Mike Keele – Deputy Director

Members of the American Zoo and Aquarium Association (AZA) may copy this information for their own use as needed.

The information contained in this studbook has been obtained from numerous sources believed to be reliable. AZA and the Oregon Zoo make a diligent effort to provide a complete and accurate representation of the data in its reports, publications, and services. However, AZA and the Oregon Zoo do not guarantee the accuracy, adequacy, or completeness of any information. AZA and the Oregon Zoo make no warranties or representations of any kind, express or implied, including but not limited to warranties of merchantability of fitness for particular purpose. AZA and the Oregon Zoo disclaim all liability for errors or omissions that may exist and shall not be liable for any incidental, consequential, or other damages (whether resulting from negligence or otherwise) including, without limitation, exemplary damages or lost profits arising out of or in connection with the use of this publication.

Because the technical information provided in the studbook can easily be misread or misinterpreted unless properly analyzed, AZA and Oregon Zoo strongly recommend that users of this information consult with the studbook keeper in all matters related to data analysis and interpretation.

Cover Photograph 2004: Left to Right: Sung Surin (SB#70) stands next to Packy (SB#48), her sire. Rose Tu (SB#361) presents to Packy. Packy is the oldest bull in the Studbook and was born at the Oregon Zoo 43 years ago.

Photo Credit: Michael Durham – Oregon Zoo

- **Date** - The field documents when the above "Location" events took place. "???" indicates no information was provided.
- **Local ID** - This is an important whorl in the animal's fingerprint and is included in the Studbook when it is provided.
- **Event** - Describes significant changes in the life of the animal including "birth" and "transfer." Ownership and loans are not recorded in the studbook
- **Name** - House names of the individuals. Many elephants have been given more than one house name as they move from facility to facility. Additional house names are included in the Asian elephant House Name Roster beginning on page 145.
