Subject: RE: Cull cattle

Good morning,

Valley Meat Co., Est. 7299 in Roswell, NM kills mostly cull dairy cattle and the last Salmonella set was completed and passed 11/12/2010. This was set C, sets A & B were both failed. Dr. [REDACTED] started in the plant in 10/2010 and completed set C, but the LEARN record shows set C ran from 7/8/2010 to 11/12/2010 with one positive. For some reason this establishment has not received Salmonella testing since.

Thanks,

[REDACTED]

Subject: Cull cattle

Hi,
DAIG and OPEER need our help gathering some information. Do you have slaughter plants that kill cull cows/cattle? If so, when was their last Salmonella set and what was the outcome?

I'm more interested in knowing the plant names and numbers that slaughter cull cattle 1st, Salmonella set data 2nd.

Thanks,

Robert Reeder Jr., DVM
