**Subject:** Rains-Gallatin

Hi Dr. Trout, David Rains just called me, he says they are ready for a walk thru. I told him I wanted to wait until you were satisfied with the HACCP system. He said they thought that would be ready for you within a week or so. They are working with [REDACTED] at the [REDACTED] for residue testing, he indicated that vet would be calling to ask some questions about validation testing for the residue avoidance program they have. The Bute and Ivermectin testing he mentioned. I talked to Dr. Cornett to see if there was a better resource to refer them to, maybe AskFSIS is the best option once they get it complete. Just a heads up.
