Subject: reporting contact with Rains

Good Morning Eric,

On Friday May 31, 2013 at approximately 8:45 a.m. [REDACTED], HACCP consultant for Rain's Natural horse slaughter program called me to let me know that he was developing their recall procedures and that they would be in place by the first of next week. He asked if I had any other questions, I asked if he had taken care of the HACCP issues identified on my previous visit(s), he assured me that they had been addressed. I had no further questions at that point and the conversation ended at approximately 8:47.
