**Subject:** RE: Horses

The plant in Missouri is expecting to receive their lagoon permit by Friday of this week. That should be the only thing left to allow them a grant of inspection. If that occurs on Friday they informed us they would need a week or so to arrange for a crew to begin work. Based on that it appears that they would be prepared to begin production on July 8, 2013 or later.

Thanks,

Paul Kiecker

We are having daily meetings in DC on equine leading up to the likely issuance of one or more grants yet this week. Please send in daily reports. In particular, I need to have an understanding of when slaughter of live horses likely could first begin if one your establishment received a grant on Thursday or Friday of this week. As soon as I know that, I will alert APHIS so that they can consider when/where joint FSIS/APHIS training will take place.

Anything new today on the horse inspection front, besides what OGC brought to our attention?
