Subject: RE: Rains

Good Afternoon Dr. Gilmore,

Neither the application nor the recommendation have a space to identify the volume. Volume is not discussed until the IIC sets up the EST profile in the PHIS database.

As a practical matter, Rains only has enough live hold pens to handle [REDACTED] animals at time, depending on size, but that is only a guess since horses have never been in the pens.

Do you all have any idea on this?

Subject: Rains

Would Rains have indicated on their application the volume that they plan to slaughter?

I wouldn't provide what they indicated, but if they aren't required to indicate at all, I'd like to be able say that.

Thank you!
