Subject: RE: Rains Natural Meats Gallatin MO, Grant application package contents list

The only designated wild and scenic river in Missouri is the Eleven Points River. The Grand River is a little over 1.5 miles south of Rains Natural Meats. The City of Gallatin, MO has agreed to accept effluent from the plant. Rains will use [REDACTED] [REDACTED] to catch all sewage from the plant. The waste will be hauled into Gallatin and disposed of in the city sewage system. The parties are familiar with this agreement as they used it prior to the plant implementing its now unlicensed lagoon system. The blood and offal contents will be caught in inedible barrels and sent to rendering. The only thing that enters the discharge water from slaughter is the carcass wash and sanitation effluent, and any incidental offal content spillage that occurs.

Subject: Rains Natural Meats Gallatin MO, Grant application package contents list

Good Afternoon Mr. Bolick,

In preparing for Mr. Rains meeting the FSIS regulatory requirements for obtaining a grant of inspection, I put together a brief history and list of items we have supporting such. If you need to see any particular item, let me know and I can scan it and send it to you. If we are missing any necessary items or you need to discuss, please let me know. Items listed as pending are unavailable or incomplete; we do not have a navigable waters certification/attestation from Rains, and the grant, cover letter, hours of operations, and voluntary withdrawal are drafts. Thank You.
